Title: Solid Waste Recycling Collection Local

#### 1.0 PURPOSE

The purpose of this Standard Operating Procedure is to provide guidelines for the management of the accumulation of solid waste and recycling materials for collection at MCAS Miramar facilities.

### 2.0 APPLICATION

This guidance applies to those individuals preparing solid waste and recyclable materials for collection onboard Marine Corps Air Station (MCAS) Miramar.

### 3.0 REFERENCES

- 40 CFR 243
- MCO P5090.2A Ch 17
- Hazardous Waste Management Plan (HWMP)
- Hazardous Material Business Plan (HMBP)

## 4.0 PROCEDURE

#### 4.1 Discussion:

Collection of non-hazardous waste must be performed in a safe efficient manner. Collection methods must prevent fires, safety hazards, pest harborage and disease carrying vectors. Activities must ensure that only non-hazardous wastes and other locally approved waste materials are disposed of in solid waste containers. Prohibited wastes include but are not limited to; household hazardous waste, hazardous waste, asbestos, medical waste, and recyclable materials. Local requirements may prohibit the disposal of bulky items, pallets, and construction debris in solid waste containers. MCAS Miramar utilizes trashcan receptacles, recyclable can receptacles, dumpsters, and roll-off receptacles for non-hazardous solid waste.

### 4.2 Operational Controls:

The following procedures apply:

- 1. Containers that collect food waste must be emptied at least weekly to reduce pest harborage and disease transmission.
- 2. Trash containers, with the exception of those in office spaces, must have lids on them to prevent pests from entering containers and to contain trash and debris.
- 3. Trash containers in areas that may come into contact with precipitation must be kept closed to prevent storm water contamination.
- 4. Trash containers must be in good condition.
- 5. All trash collection areas must be policed daily.
- 6. Recyclable material must be placed in the proper recyclable collection containers.
- 7. Waste containers must be stored a minimum of 50 feet from occupied buildings to reduce fire hazards and pest infestation/disease-carrying vector problems.
- 8. Disposal of liquids in solid waste is not permitted.
- 9. Disposal of hazardous material and hazardous waste in trash is prohibited.
- 10. Disposal of ammunition is prohibited.
- 11. Disposal of Material Presenting Potential of an Explosive Hazard (MPPEH), (i.e., ordnance, range residue, trash, anything coming off the range).
- 12. Disposal of pressurized containers, such as aerosol cans, in solid waste is not permitted.
- 13. Tires are not permitted for disposal; they must be recycled.
- 14. MRE heaters must be deactivated before disposal as non-hazardous solid waste, since they may react with water and create a fire.
- 15. Bulky materials and metal items will not be placed in dumpsters, but should be turned in as scrap.
- 16. No parking of vehicles or placing any other objects in front of solid waste receptacles.
- 17. Contact Waste Management Division (WMD) for prohibitions on waste that may be disposed of in trash containers, and or if problems with solid waste collection containers exist.
- 18. If there are any specific situations or other concerns not addressed by this procedure, contact the WMD.

#### 4.3 Documentation and Record Keeping:

The following records must be maintained for solid waste and recycling management:

1. Inspection and training records.

# 4.4 Training:

All affected personnel must be trained in this Standard Operating Procedure and the following:

- 1. Hazard Communication training.
- 2. General Environmental Awareness training.

## 4.5 Emergency Preparedness and Response Procedures:

Refer to HWMP/HMBP

### 4.6 Inspection and Corrective Action:

The Environmental Compliance Coordinator (ECC) shall designate personnel to perform inspections. The ECC shall ensure deficiencies noted during the inspections are corrected immediately. Actions taken to correct each deficiency shall be recorded on the inspection sheet.

Solid Waste Recycling Collection	on Local – Inspection Check list
